## Cycle rack hire for special events

Provide high quality cycle parking at your next event, encourage event-goers to cycle, and reduce traffic congestion.

Available for hire. The event racks are an innovative design that can be easily moved and requires no assembly. The patented design is fully u-lock compatible and supports the bike frame in two places.

The user friendly design means event goers can easily park their own bike. No event staff or volunteers required.

The event racks are delivered to site and set-up as required. We can also advise on best practices around event cycle parking

## Customise your bike parking

Add another option for your event sponsors, or include your own branding. Full colour signage can be provided for the ends of the racks.

# Racks

## Layout

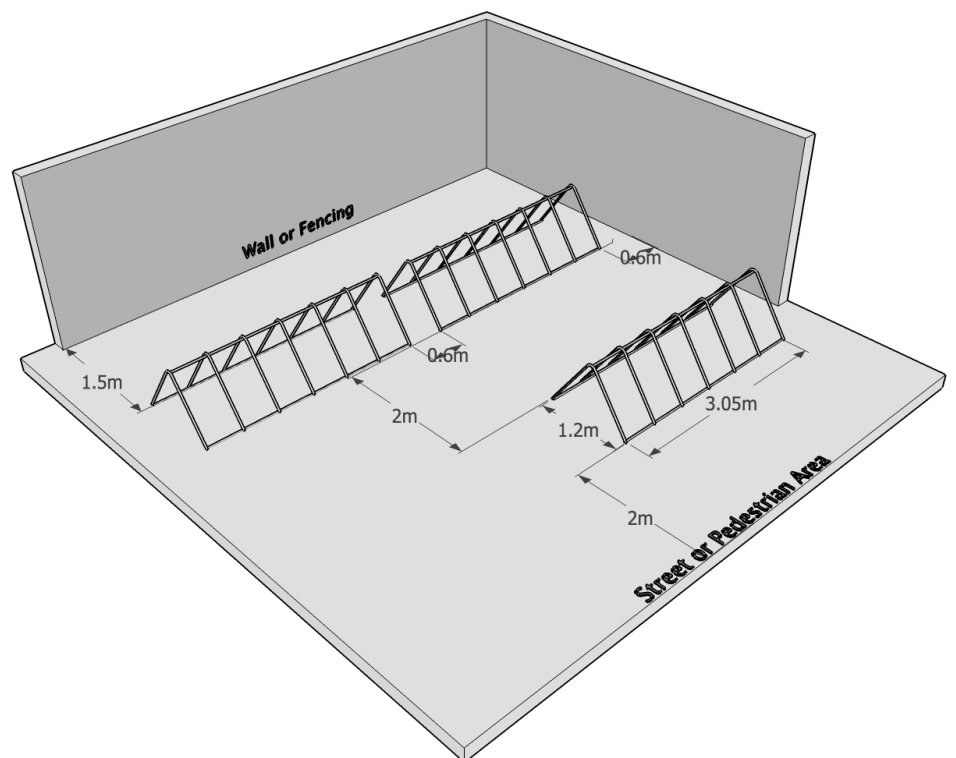

The racks require 1.5m clearance from walls and fencing and 2m clearance between rows of racks and pedestrian areas.

## Capacity

Each rack holds 14 bikes. Parking for up to 140 bikes is currently available for hire.

## Dimensions

Each rack is 3.05m x 1.2m
